

# Garment Measuring Guide For The Best Fit

If you are unsure of what size to order, follow the instructions below. All you'll need is a tape measure ...and a partner!

**Chest / Bust** - Measure across the fullest part of the chest holding the tape firm and level.

**Waist** - Measure around your natural waist line, or belt line.

**Hip** - Measure around the fullest part of your seat while standing.

**Sleeve Length** - with your arm hanging relaxed at your side (slightly bent) measure from center back neck, over the top of the shoulder, down the outside of the arm to the wrist bone.

Remember, your motorcycle jacket will have extra sleeve length built in. Don't compensate for extra length. Just take your actual measurements.

**Thigh** - Take a measurement around your thigh, half way between your waist (see above) and the center of your knee cap. On a six-foot-tall male this should be roughly 10 inches above the knee.
